

Screen Doors:

The Northwood Pointe Maintenance Association has approved a retractable screen door for use throughout the Northwood Pointe community. The manufacturer of the screen door is "Mirage". You may reach the manufacturer at (877) 364-7243 to request local dealer information. The screen door is virtually invisible and cannot be seen from the street. When not in use, the screen retracts in its framing leaving your front door visible. If you want a screen door and choose to use this manufacturer, it is not necessary to submit for approval. If you would like to use any other type of non-retractable screen door, you must submit a formal application and sample pictures of the screen for the Board to review. There will not be a review fee for this process. Remember, the above only applies to Northwood Pointe Maintenance Association. If your sub-association requires an approval process for exterior improvements, you will need to consult with them prior to having your screen door installed.
